Quality Policy

The Quality Policy of INLEEx Engineering Pty Ltd is as follows:

INLEEx Engineering is committed to the delivery of "on-time", cost effective, high quality products and services that satisfy the diverse requirements of our customers' in the resources sector, with constant endeavour to achieve beyond customer needs and expectations and to remedy non-compliance in an efficient and timely manner.

INLEEx will achieve this by implementing a Quality Management System that will provide processes and procedures compliant to ISO9001:2015 that will instill long term success and sustained improvements.

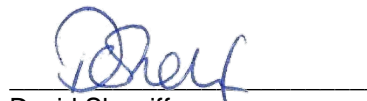

INLEEx understands that to achieve this, all personnel within the company must be on board and are aware of the significance of their responsibility in achieving, maintaining, producing and consciously working towards improving company standards.

INLEEx is therefore committed to providing personnel with the necessary training and established systems to achieve the standards required to provide excellence in service to our customers.

INLEEx undertakes to ensure the system is well communicated within the company by Managements commitment to internal audits on a regular basis to ensure continued stability and improvement within the QMS and external audit reviews to ensure commitment to a compliant quality management system.

This policy applies to all INLEEx Engineering personnel, contractors, and visitors affiliated with INLEEx Engineering, across all projects and operations at all times.
